Specifications

Dimensions. Ratings. Part Information

We construct our safety nets using top-quality materials and assembly methods to assure the highest level of safety in the field, so that you can concentrate on the business of construction.

Personnel Safety Nets

Fall Protection System

Strong Man's Personnel Safety Nets (PSNs) provide fall protection and comply with OSHA and American National Standards Institute (ANSI) regulations. Strong Man designs and manufactures safety systems that are available in stock and in custom sizes to meet your workplace needs. Personnel Safety Net Systems when installed horizontally provide passive fall protection for workers above the nets and passive Debris Netting protection for workers and the public below the nets.

The PSN's high tensile strength and an optional fine mesh lining make it suitable for the capture of all types of construction debris, including fine debris, tools or large, spalling concrete and bricks.

- High Strength Knotted Nylon
- Base Net: 4-inch, double-strand, diamond construction
- Debris net liner: 1/16" pe or 3/8" polyester mesh
- PSNs are available with or without debris net liners.
- Stock & Custom sizes available
- Forged steel snap hooks are lashed into place every 48-inches. Staggered spacing on opposite sides allows for nets to be easily connected to each other.
- Designed and tested to withstand force in excess of 17,500 foot-pounds. They have been certified to comply with ANSI A10.11 and OSHA 1926.500-Subpart M.
- Fire Retardant nets meets NFPA 701, available upon request
- Protects workers, pedestrians and adjacent buildings & properties
