

# Strong Block Containment Nets

## Custom Debris Netting

Picture Description: Strong Block Containment Net

## Specifications

### Dimensions. Ratings. Part Information

The interconnected panel design allows the netting to cover a vast area by utilizing multiple support points, maximizing strength and protection. The grommeted borders provide convenient attachment points for secure installation. Our knotted netting excels at containing and deflecting debris, making it an ideal choice for this application.

## Strong Block Containment Nets

### Custom Debris Netting

#### Strong Block Debris Containment: **Maximum Worksite Safety**

Eliminate hazardous falling debris with Strong Block's dual-layer net panels. Designed to wrap directly around structures, these heavy-duty containment systems provide unparalleled protection for workers, pedestrians, and property.

Strong Block's innovative stacked net configuration can securely contain up to 10,000 pounds of debris - from tools to small & mid size spalling and debris. The interlocked bordering seam maximizes strength, ensuring nothing escapes the double-layered net.

Whether installed vertically, horizontally, or fully enclosing a worksite, Strong Block panels proactively prevent jobsite materials from becoming deadly airborne or falling hazards. Get a step ahead of disaster with Strong Block's uncompromising debris containment and worksite safety.

Safeguard your people and surroundings from hazardous debris with the unmatched strength and versatility of Strong Block containment systems.
